# 1 Blocking overseas access

Not travelling? Block your Singpass from overseas access to **prevent unauthorised use.**

- 1 Log into your account via [singpass.gov.sg](https://singpass.gov.sg) on your browser
- 2 On the top left, select 'My account', then 'Update profile'
- 3 Select 'block' access from outside of Singapore

## \*Security Preferences

These settings protect your account from potential scams and phishing attacks. For better security, we recommend blocking access to services where applicable.

Access from outside of Singapore<sup>®</sup>:

☒ Block ☐ Allow

Similar to restricting usage of your credit card overseas, and only activating it for travel

\*This feature is only available on the Singpass portal

## ② Accessing digital services via Singpass

When accessing digital services via Singpass, you will be directed to the Singpass login page.

**Check that the web address of the Singpass login page is [login.singpass.gov.sg](https://login.singpass.gov.sg) with a “lock” icon in the address bar.**

## Safeguard your Singpass account

Just as you do not allow others to use your NRIC to perform transactions, you should **refrain from allowing others to use your Singpass account** too.

Criminals can abuse Singpass accounts to commit crimes. You may be held accountable if you are found to have facilitated such crimes.
